

## REMARKS

### Status of Claims:

By way of the instant amendment, claim 4 had been canceled and claim 21 had been added. Thus, claims 1-3, and 5-21 remain for examination.

### Prior Art Rejection:

Claims 1-4, 6, 8-10, 16 and 18-20 stand rejected under 35 U.S.C. 102(e) as being anticipated Louis et al (US6674425B1). Claims 5 and 17 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Louis et al (US6674425B1).

The examiner's rejections are respectfully traversed.

As to the rejected claims, claims 1 and 16 are independent. Both Claims 1 and 16 include the limitations of "a housing which contains an electronic component therein, and has an outside wall which has --- an interior surface exposed inward of the housing" and "a pointing device having a flat input surface laid on the interior surface of the outside wall".

The cited reference does not disclose the above limitations.

As to independent claims 1 and 16, the examiner, citing Louis, identifying a thick outer bezel 160 of a unitary molded plastic body 152 as the housing. However, the bezel 160 does not contain any electronic component therein, and Louis does not show any flat input surface laid on the interior surface exposed inward of the housing.

Applicant's dependent claims are deemed to be patentable at least for the same reasons discussed above with respect to independent claims 1 and 16.

Applicant has added new claim 21. Claim 21, in the same fashion to claims 1 and 16, includes the limitations of "a housing which contains an electronic component therein, and has an outside wall which has --- an interior surface exposed inward of the housing" and "a pointing device having a flat input surface laid on the interior surface of the outside wall". As such this claim

Serial NO. 10/635,631

likewise distinguishes applicant's invention over the prior art and deemed patentable thereover.
